IOT PHASE

PROJECT TITLE: Noise pollution Monit

PHASE 3   : Development pa

Presented by:

- s.ponselvi
- P.Nandhini
- Mahalakshmi.M
- Deepa.s

Introduction:

Noise pollution is a growing problem i
rapid population growth, urbanisation
Moreover, at times, a noisy neighbour
crazy and affect your well-being.

Talking loudly is an annoying habit in
Having a loud co-worker can distract t
our productivity. To help solve this pro
a noise detector with automatic recor
notifies users whenever it detects lou
crosses certain limits), as well as it au
sound and saves this recorded sound

Components required:

. To build this device, we need to first
